supply and recommend

SULO

MGB 360

Material and Design

- Polymer components injection moulded from specially designed HDPE
- Resistant to decay, frost, heat and many chemicals
- Special UV-stabilisation provides excellent ageing characteristics
- Additives are cadmium free and environmentally friendly
- Metal components are corrosion resistant
- Quiet-running solid rubber tyres
- Suitable for all DIN lifting equipment
- Compatible with identification and weighing systems
- Fitted as standard with chip nest in accordance with RAL GZ 951/1
- High quality materials and most advanced manufacturing processes guarantee a long service life
- All container parts are recyclable
- EURO 2 lid

Quality

- Certified according to EN 840 and RAL GZ 951/1
- Constant quality control through own laboratory as well as independent institutes

Safety and Handling

- Double angle rail for highest safety during emptying
- Safe and easy to manoeuvre
- Continuous handle on the body
- Recessed step at the rear to aid tilting
- Special ribs prevent containers from becoming jammed when stacked
- Particularly stable due to external position of wheels
- Open wheel case prevents accumulation of dirt
- Easy to clean due to smooth surfaces and rounded internal corners
- No water ingress when opening the lid

Colours

- Standard colours grey, green, brown, blue, yellow and red
- Special colours are available on request

Accessories

- Comprehensive range of accessories in separate brochure

all dimensions according to EN 840
